SPITTING MAD...!

Life after FL Amendment 1

While campaigning, I listened to Floridians describe their thoughts and perceptions regarding FL Amendment 1. It was quite disheartening to hear all of the misinformation regarding this amendment. When you learn what FL Amendment 1 is really about, I'm pretty sure...

YOU'LL BE SPITTING MAD!!

Most people actually thought this amendment was about *CONSERVATION*, specifically WATER conservation.

It is NOT!! It *IS* about:

A MASSIVE *Redistribution of Florida Tax Dollars to Environmental Groups* that have already-bloated budgets and work with the United Nations.

Really?

You thought FL Amendment 1 is about SAVING WATER

for Florida.

SURPRISE !!

How can I say that? Just go to their web sites. You can find the list here:

[http://ballotpedia.org/Florida Water and Land Conservation Initiative, Amendment 1 %282014%29](http://ballotpedia.org/Florida_Water_and_Land_Conservation_Initiative,_Amendment_1_%282014%29)

These NGO's (Non Government Agencies and Non-Profits) proudly display their

partnership with the United Nations (UN) under their desire to be Sustainable. But exactly what does that mean? No one seems to know, yet it is a word thrown around quite often.

What does the UN think about private property?

Read their words in the [UN Habitat Preamble Section D regarding LAND](#):

"Land, because of its unique nature and the crucial role it plays in human settlements, cannot be treated as an ordinary asset, controlled by individuals and subject to the pressures and inefficiencies of the market.

Private land ownership is also a principal instrument of accumulation and concentration of wealth and therefore contributes to social injustice; if unchecked, it may become a major obstacle in the planning and implementation of development schemes.

Social justice, urban renewal and development, the provision of decent dwellings and healthy conditions for the people can only be achieved if land is used in the interests of society as a whole."

The UN environmentalists believe that 80% of Florida must be under their conservation. Private land ownership is off the table...NOT an option!

Basically, "SUSTAINABILITY" means that you can't touch any natural resource for fear that you will "use it up" for the next generation. That, of course, does not make sense. While you are being told to do without, the Elite *flaunt* their extravagant lifestyles...*Which they made off of YOUR TAX DOLLARS!*

Yet, compliments of the media, What do we see?

- **Photos of Americans living in forests, cars, and tents**
- **Tent cities our homeless citizens live in**

YOU are told that a 700 sq ft apartment is BEST for you and you family.

**YOU must Downsize, YOU must use less Resources! CONSERVE! RE-USE!
Reduce YOUR Carbon Footprint! Don't Drive! Ride a Bicycle, Walk!**

...FLIP the channel, and then view the lifestyles of the rich & famous, the fancy mansions, cars, and trips...of Al Gore, Bill Gates, The Clintons, etc.

Do not misunderstand. No one cares how the Elite live.

What we *DO* care about is that they have regulated our businesses *out of existence* - so there is *NO COMPETITION*.

The Elite then get their uber-rich lifestyles and mansions...at *OUR EXPENSE*.

YES, *YOU THE TAXPAYER*...

GET TO PAY FOR THE ELITE...

To Enjoy & Live a Grand Lifestyle!

(that's why it's called the *Privileged Life*...YOU get the "Privilege" of supporting the Elite...*for your entire life!!!*)

(Are you Spitting Mad, yet?)

FL Amendment 1 - is then ONE of the TOOLS

used to regulate YOU...OFF OF YOUR OWN LAND!

(Right now, I'm so mad I could just...SPIT!)

Will large Developers who got grants (your tax dollars) to develop land - now get your tax dollars...*NOT* to develop land? That's a nice gig. The developer gets the land free-of-charge and *then is paid not to develop the same land*. Where do I sign up for that program?

Conservation is also a tool to take your money for their salaries and overhead. If we told them tax dollars could not be used for salary and overhead, how long do you think anyone will last?

Let's take WATER, for example At a Water Management District (WMD) meeting, the WMD was asked if the quality of the water improved since they took over the water...

That answer was, "WE DO NOT CHECK THE WATER QUALITY."

Then exactly WHAT do they do?

WHY exactly are we paying them?

What exactly do they Manage?

WMD then told us about all of the land they own. They forget where they got the money to buy that land. The WMD gets money from the taxpayer, to BUY LAND.

WMD LAND then comes off the tax rolls (YOUR TAXES WILL GO UP!) and LAND goes into a Conservation Program (over 40% of Florida is locked into some conservation scheme.)

If people want to use the land they must now get a permit, and in some cases, even pay *additional* fees.

To summarize:

Floridians PAID for the land - which is no longer taxable!!

(wait for it, wait...SPIT!)

Municipalities lose money and services. Municipalities raise taxes. Floridians pay higher taxes and are now limited in use of the land. Water quality is not a concern. This is Not logical.

Think of all that money...!

FIVE YEAR FUNDING HISTORY						
		10 YR HIST FY 2010-11	10 YR HIST FY 2011-12	10 YR HIST FY 2012-13	10 YR HIST FY 2013-14	10 YR HIST FY 2014-15
Department Title	Fund Title	ALL FUNDS	ALL FUNDS	ALL FUNDS	ALL FUNDS	ALL FUNDS
ENVIR PROTECTION, DEPT OF	LAND ACQUISITION TF	494,380,030	459,259,903	464,351,549	187,898,219	190,817,288
NOTES:						
1. Debt service was reduced by \$260 million in FY 2013-14 because the Florida Preservation 2000 bonds were retired.						
2. There are other trust funds such as the Florida Forever Trust Fund and the Save Our Everglades Trust Fund, in addition to General Revenue appropriations, used to purchase/conservate land and protect/restore the environment that are not part of the Land Acquisition Trust Fund						

Florida does not have a water shortage problem, Florida has a *water storage problem*. Will that be addressed? NO! Florida is a peninsula 3 sides touch water:

- **If there was a shortage concern, wouldn't it be smart to work on *Desalinization Programs*?**
- **If the water quality which no one checks is poor, then wouldn't it be smart to work on NATURAL FILTERS...like HEMP?**

No folks, Hemp is not marijuana. HEMP is a natural filter and a very versatile

**crop highly used in industry. Florida is the largest importer of HEMP in the US.
Why are our farmers starving...when they could be growing HEMP?**

Because it is not about the water or its quality.

It is about *MONEY!*

(wait for it, wait, wait....SPIT!)

HEMP is on the NO GROW list from the 1930's and needs to be revisited - as the lies about HEMP are exposed. If small farmers grew HEMP, which large corporations will be affected?

http://naihc.org/hemp_information/hemp_facts.html

There are many solutions for the “water problems” in Florida that do not require restricted land and water use, meters on private wells, rain water taxes, or giving large sums of money to conservation groups without oversight.

They make rules with penalties (unconstitutional as Article 4 Section 4 states we are guaranteed representatives to make law, not unelected officials)

If unchecked, eventually...

WE WILL LOSE our right to own private property!

(the UN wants 80% of Florida under conservation).

(Don't hold back, just do it!...HUMUNGOUS SPIT!)

Don't just get Spitting Mad...

YOU CAN do something!

Unless the people *use their voice*>

The Republicans now have the majority. For the last 3 years we have been trying to get a bill passed to protect our private property. Only a handful of legislators stood for the people!

Action Plan for Amendment 1: A bill is needed to protect private property against warrantless attacks by conservation groups.

Your Job: Follow up with *YOUR* Legislators. They all made promises in order to get elected, now it is time to see if they *really* represent you. Hold their feet to the Fire!

(But, remember...there is No Spitting allowed on the Floor!)

WEATHER WATCH

Arctic Blast via 'Polar Vortex' to Chill 42 States -30° Wyoming

Dr. Kaku Warns That "All Hell Is Ready to Break Loose ...

Those of you who follow the *real* weather patterns of John Casey and his research team, not the UN fables...knew this was coming.

For the rest of you, GET PREPARED NOW. The Polar Vortex is a made-up term used to justify the failed warming theory. This frigid air is not an anomaly.

The sun, not man controls the weather and the sun is in hibernation. 200+ years ago during this type of frigid pattern, people walked across the Hudson River. Will you rely on solar and wind energy or coal and oil to keep warm? Yet we promote more failed "green" energy policies.

Buy FOOD - What do you think will happen when crops fail?
